2. It should be noted that in addition to rearranging priorities there are two additional copies recommended. The first is 1DN of the primary film for NRTSC and the other is 1DP of the stellar photography for ACIC. The NRTSC addition is requested for the special missions only, however, the ACIC addition corrects an oversight in COMOR-D-34/37 Tab I (Revision 1).

3. In view of its detailed utilization of these materials and location in the Washington Area DIA recommends that AMS be temporarily designated as the central repository for original negatives of the special KH-4 missions, vice the NPIC. This responsibility will include loaning the originals to other agencies, in accordance with instructions from DIAMC. At a future date to be determined by the [] NRO, physical custody also should be transferred to DIA.

4. In order to rectify permanently the oversight mentioned in paragraph 2, above, it is recommended that COMOR-D-34/37 Tab I (revision 1) be amended as follows:

<u>PRIORITY</u>	<u>TO</u>	<u>PRIMARY</u>	<u>STELLAR</u>	<u>INDEX</u>
4	ACIC	2DP	1DP	1DP
